

SHORT COURSES 2019

Students who wish to do short programmes can complete the modules of our Higher Certificate in Facilities Management as a short course.

There are 2 options for how short courses can be done:

1. If students simply want a **certificate of attendance**, they are able to attend 2 days of lectures / training and be given all the material for the module for further reading and study.
2. If students want to get recognised **credits for the short course** and engage with it more formally, they can attend the 2 days of lectures, will have to write 2 tests, submit 2 assignments, write an exam and complete a practical element of Work Based Learning, after which they will have achieved 20 credits at NQF level 5 and would be able to continue with more formal FM studies later on if they decided to do the formal HCFM programme or an accredited programme at another tertiary institution.

The cost of doing a module as a short course is **R 8 700**.

There are 7 different modules from which to choose. All our programmes are offered online, so students can participate even if they are not able to attend the contact sessions, which take place in Pretoria. Online video conferencing with lecturers is made available for other students.

Customised short courses can also be done at any venue where there are 8 or more students registered

The courses take place according to the following schedule:
